

## Cyber Pro

**Best in its class.** The Cyber Pro treadmill offers the commercial facility exceptional quality and reliable performance. Designed to optimize investment, the Cyber Pro joins the comprehensive Cyber cardiovascular line as a high quality option, ideal for core commercial use.

**Easy to maintain.** The Cyber Pro treadmill combines an innovative, sleek new design with basic functionality to satisfy any member and minimize facility maintenance. Drive belt edges are securely covered to prevent fray, dirt build-up, and the potential for shoe laces or other items getting caught in the belt. The integrated I/O port allows for quick and easy download of maintenance logs and upload of software upgrades. Key safety features are also built in, including a safety lanyard and our Safety Sentry™ automatic shut-off.

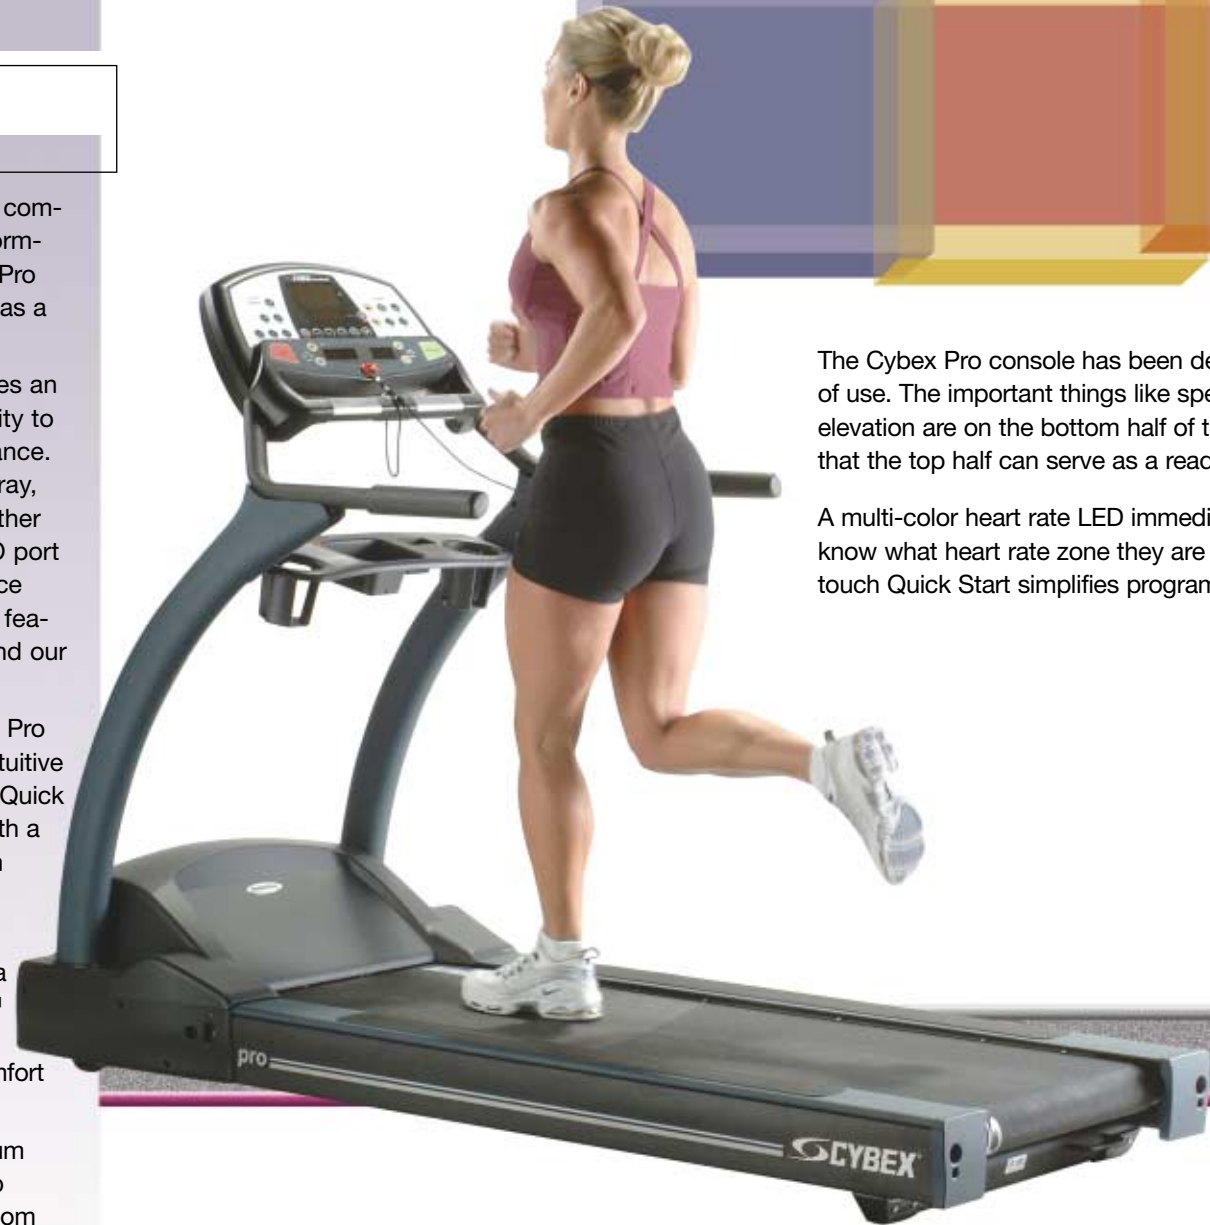

**Attention to detail.** Competitively priced, the Cyber Pro doesn't skimp on user-friendly features. Its large, intuitive display simplifies programming and operation. The Quick Start mode lets users enter the Manual Program with a single touch, while a live keyboard permits program changes without starting over. Our special decline feature adds functional variety to any workout.

With the Cyber Pro, users can monitor heart rate via contact grips or a wireless monitor. Our Stableflex™ Suspension system absorbs impact where it occurs and provides stability where needed for optimal comfort and running efficiency.

**Contact us.** Cyber is the leading provider of premium fitness equipment for the consumer and health club markets. Call today or e-mail us at [info@cybexintl.com](mailto:info@cybexintl.com) for information on our complete line of quality equipment, financing and leasing options.

**Stableflex™**

*The Stableflex™ suspension system  
absorbs impact on landing and  
provides stability on push-off*

The Cyber Pro console has been designed for ease of use. The important things like speed, time and elevation are on the bottom half of the display so that the top half can serve as a reading rack.

A multi-color heart rate LED immediately lets the user know what heart rate zone they are in, while the one touch Quick Start simplifies programming.
