CYBEX 750 ARC TRAINER

The new CYBEX 750A and 750AT Arc Trainers offer the same excellent performance and versatility as the previous Arc Trainers, but now have an updated design, with more features and overall more comfort for increased user enjoyment. The new Arc Trainers have a stylish and modern appearance to complement your facility, and complete the look for our 750 series family which also includes the 750T treadmill and 750C and 750R cycles.

The Best Just Got Better, with CYBEX's new Arc Trainers!

CYBEXcellence

THE ARC TRAINER DIFFERENCE

CYBEX's superior biomechanics on the Arc Trainer allows for high intensity training that places high loads on the muscles with less stress on the joints. This also means that users who train on the Arc Trainer feel less perceived exertion, and get the least stressful workout of any cross trainer or elliptical on the market, because of correct load application. The Arc Trainer's Advanced Stride Technology offers the variability and versatility of a changing pattern of motion. For example low inclines provide a gliding type of motion with modest hip and knee motion, while progressively higher inclines provide comparable increases in hip and knee motion. From mild to wild, some cross trainers talk about variability in their workout, the CYBEX Arc Trainer truly delivers it.

Same great exercise in a smaller footprint

Exceptionally broad power range

750 Family Display

specifications

Product Number	750A, 750AT
Resistance Range	Up to 900 Watts
Incline Levels	21 levels
Dimensions	750AT: 77" (196 cm) L x 62.5" (159 cm) H x 36.75" (93 cm) W at upper hand grips; 28.5" (72 cm) at base 750A: 77" (196 cm) L x 62.5" (159 cm) H x 28.5" (72 cm) W
Max User Weight	400 lbs (181 kg)
Power	Self-powered utilizing a hybrid eddy current brake with generator and dual stage drive.
Stride Length	24" (61cm)
Portability	Wheels on front for easy rolling
Drive Type	Double step-up drive
Display	Graphic display of profile via 10 x 15 LED.
