

LCD Widescreens

We offer a variety of models that combine the elegance of AQUOS™ Liquid Crystal Television design with a widescreen Advanced Super View LCD panel that is HDTV-compatible and PC-compatible. They also offer 170 x 170 viewing angles, High Contrast Ratio (800:1), and very high brightness.

Sizes from 13" to 65"

More Affordable Plasma Displays

In addition to our LCD widescreen offerings, we also offer Plasma displays. Each deliver optimum image quality and reliability in any viewing environment. Experience the purest, film-like quality in plasma TV with unmatched performance and design.

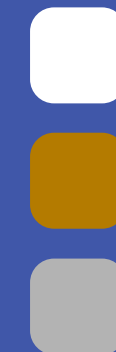

Koss Stereo Headphones

CardioVision also offers select styles of Koss brand Stereophones. These lightweight portable headphones are ideal for exercisers, and have foam ear cushions that offer open, hear-through sound. We offer both an adjustable headband or a behind the head design that is ideal for extended wearing periods.

see the future of

Personal Viewing Screens

SHARP AQUOS

At CardioVision, we offer products that will keep them coming back for more. Nobody projects the future of personal viewing screens more clearly than CardioVision. Our 15" screen, the largest in the industry, with an enhanced LCD panel that brings you all of the picture qualities you have come to expect from SHARP®, the leader in LCD TVs.

Your 170° x 170° viewing angle TV is designed with SHARP's proprietary black TFT panel, making it bright enough to be positioned near windows or in high-glare locations, utilizing its Advanced-Edge-Light system a backlight technology that increases contrast and image clarity. CardioVision boasts consistently accurate color – which results in deeper blues, more vibrant reds, and absolutely precise flesh tones.

Each unit features 60,000 hours of lamp life, V-Chip (parental control) component video, composite video, S-video and RF-Antenna inputs, and a built-in 181 channel cable tuner that eliminates the need for extra hardware or bulky external components. Ask about our optional CD/DVD/MP3 features that will satisfy your members' every need.

15" LCD Screen

Universal Stand

CardioVision offers the most stable LCD stand in the industry. Our stand meets all UL 15° tip-test requirements and offers visually friendly concealed cord/cable management. Our stand is fully adjustable in height and width to accommodate all cardio manufacturers.

Custom Attachment

Entertainment Solutions

In addition to personal viewing screens, CardioVision also provides more traditional entertainment solutions for your club. Including standard televisions with wall or ceiling mounts and FM transmitters. Our FM transmitters allow exercisers to tune their personal radio or FM receiver to the frequency posted on the TV to hear crystal clear television audio.

Wireless Transmitters & Receivers

Our FM Transmitter makes it easy for your guests to listen to the television program of their choice, and it's easy to install. Simply plug the transmitter into the audio out on your TV and tune our user-friendly interface to the appropriate station. Members can also listen with any standard FM radio.

simply Brilliant

Controller

The CardioVision system offers a convenient, easy to use, ergonomic controller. It offers direct channel access, power on/off, as well as basic channel and volume functions. You can even select audio and video source independently if you use our optional cd/dvd player.
